PREFACE.

THE fifteen sectional parts of this volume have already been issued separately, and are now presented collectively accompanied by a General Index covering the subjects treated. Every care has been taken to keep the work free from errors; but if any have escaped detection it would be deemed a favour if their nature were indicated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments, and to others, who have kindly supplied all desired information, often at considerable trouble.

NOTE.—The figures quoted above represent the population of New South Wales within its present boundaries. Victoria was separated from New South Wales on the 1st July, 1851, and Queensland on the 10th December, 1859. The Federal Capital area of Yass-Canberra was transferred to the Commonwealth on 1st January, 1911.

Aborigines.—Aborigines are included in the totals for the last five Censuses. The numbers included were 983 in 1871, 1,643 in 1884, 2,280 in 1891, 4,287 in 1901, and 2,022 in 1911.

* The population of the Federal Capital area (997 males, 727 females, 1,724 persons) is included.

* The figures in this column represent distinct children who have attended a State school the whole or some portion of the year, children who may have received instruction at more than one State school during the year being counted only once.

† The enrolment of scholars and the average daily attendance being determined for each quarter of the year, an average of the four quarters is taken, and the result is as stated.

‡ These figures include children temporarily absent from illness or other causes, but excludes those who are known to have left school.

§ Children attending subsidised schools are not included in these figures.

Compulsory Attendance.—The Amended Public Instruction Act, 1916, provides that all children between the ages of 7 and 14 years must attend a State or Certified School, unless sufficient cause of absence be shown by the parent.

Religious Instruction.—Under the Public Instruction Act (43 Vic. No. 23), which came into force on 1st May, 1880, it is provided that the instruction imparted at Public Schools must be absolutely unsectarian. "Secular instruction" is defined by the Act as including "general religious teaching as distinguished from dogmatical or polemical theology." Provision is made for authorised teachers of any denomination to give religious instruction at specified hours to the scholars belonging to their religion, and separate class rooms are provided generally for this purpose. The total number of visits paid to State schools during 1915 by authorised teachers was 64,864, namely :—Church of England, 35,342 ; Roman Catholic, 1,358 ; Presbyterian, 8,485 ; Methodist, 12,353 ; other denominations, 7,326.

Subsidised Schools.—Subsidies are granted only in the case of children resident in thinly-populated country districts, so far removed from any Public School that attendance is impracticable. The conditions are that where a private teacher is engaged by two or more families in combination, or by a single family with not less than four children of school age, such teacher, if approved by the Minister, may be paid subsidy as follows :—

"In the Eastern portion of the State at the rate of £5 per pupil per annum on the average monthly attendance, such aid not to exceed £50 yearly, and in the Western portion of the State, £6 per pupil per annum, not exceeding the sum of £60 yearly. The Western portion of the State shall be that portion within which living allowances are granted to Officers under the Public Service Board."

Subsidy may be paid also to a parent as an aid towards the boarding of the children with friends or relatives in a township for the purpose of attending a Public School, at the rate of 6d. per day in the Eastern Division of the State, for each full day's attendance, up to a maximum of £5 per child, per annum, and at the rate of 7d. per day, up to a maximum of £6 per child, per annum, in the Western Division of the State.

Superior Public Schools.—In addition to the above Superior Public (Day Continuation) Schools, established in 1912, there are other Public Schools entitled to the designation "Superior" by having at least 20 pupils eligible to join a fifth class. In these schools, the course of work in English History, Geography, Mathematics, Elementary Science, Drawing, and Manual Work, is that prescribed for the first and second year's course in the High School syllabus. The course of study does not include languages other than English, except under specified conditions. No statistics of this latter type of school are available.

Private Benefactions.

Falkiner Scholarship.—Towards the close of 1910, Mrs. F. S. Falkiner, of Boonoke, Deniliquin, donated the sum of £2,500 to establish a Scholarship as a memorial to her late husband. The Scholarship, which is open for competition at the leaving certificate examination to boys attending the Hay District School, entitles the holder to free University education and text-books for four years, and a grant for board and lodgings.

Riverina Scholarship.—As the Falkiner Scholarship is available for competition only once in every four years, the Department supplemented the award by a Scholarship similar in value to be known as the "Riverina Scholarship," which will be open for competition every alternate year. This was first awarded from the beginning of 1914.

For Scholarships, &c., at Sydney Grammar School, and at University of Sydney, see Tables Nos. 38, 52, and 53.

The Teachers' College, Sydney, provides various courses preparing teachers for positions as rural school teachers, primary, kindergarten, and secondary school assistant teachers. Courses range from six months—for rural school teachers—to three and four year courses, leading to graduation in Arts or Science. In addition to academic work at the College, students are given practical work in the Demonstration Schools at Blackfriars, North Newtown, and Darlington, and at selected supplementary practice schools.

Honorary Degrees.—The University has no power to confer honorary degrees.

N.S.W. Medical Degrees.—As notified in the *Government Gazette* of 6th June, 1890, the second part of the British Medical Act of 1886 applies to New South Wales. Holders of the degrees of M.D., M.B., and Ch.M., conferred by the Sydney University, are consequently recognised; and may be registered in the United Kingdom in the same way as holders of similar degrees, conferred by a British University, are registered in New South Wales.

Faculty of Medicine—Hospitals.—The Royal Prince Alfred Hospital was constituted a General Hospital and Medical School for the instruction of students attending the Sydney University. The Chancellor of the University and the Dean of the Faculty of Medicine are Directors *ex officio*. Other Hospitals recognised by the University as places where study may be carried on in connection with the Faculty of Medicine are Sydney Hospital, St. Vincent's, the Royal Hospital for Women, Royal Alexandra Hospital for Children, the Gladesville and Callan Park Hospitals for the Insane, and the Women's Hospital; and, for Dental students, the United Dental Hospital of Sydney.

Under its Charter, the University of Sydney may confer, after examination, degrees in arts, law, and medicine; but not in theology and divinity. Graduates of Sydney University rank equally with graduates of British Universities.

Under the Act of 1884 women have all University privileges; and degrees may be granted to women in all branches of knowledge.

Senate.—The government of the University, by the University and University Colleges' Act of 1900, was vested in a Senate, consisting of sixteen (16) elected and not more than six (6) *ex officio* members, being Professors of the University. By the amending Act of 1912 the Senate is now constituted of four Fellows appointed by the Governor—one Fellow elected by the members of the Legislative Council, one Fellow elected by the members of the Legislative Assembly, five Fellows representative of the teaching staff of the University, ten Fellows elected by the graduates of the University, and three Fellows elected by the aforesaid Fellows. The Act of 1912 provided that in addition to the ten Fellows elected by the graduates, the late Honorable Sir Normand MacLaurin and His Honor Judge Backhouse should each during his life be a Fellow of the Senate. The Senate elects from its members a Chancellor, who holds office for three years, and a Vice-Chancellor, who is elected annually.

Faculties.—There are now four Faculties: Arts, Law, Medicine, and Science. A Dean is appointed by the Senate to each Faculty from time to time for a term not exceeding two years. There are also Departments of Engineering, Dentistry, Veterinary Science, Agricultural Science, Economics and Commerce, and Military Science.

* Includes two special lectures. † Many courses were cancelled by centres on account of the outbreak of war. ‡ Includes 4 special lectures.

Note.—The low average attendance at Extension Lectures since 1909 is due to the fact that the Board is now doing very much more work in country towns where the attendance, though generally good, cannot be large. The diminution, therefore, is not to be considered an unfavourable sign. In 1915 nearly all centres suspended operations on account of the war.

University Extension Lectures.—Courses consist of as many lectures as required, and may conclude with the examination of students whose attendance has been satisfactory; but no course may be of less than three lectures and in short courses no examination is allowed. Special free lectures are given singly or in course when opportunity and means permit.

Notes regarding items in years prior to 1915, are contained in this part of the Statistical Register for those years.

Finance.—The supervision of the financial affairs of the University is entrusted to a Finance Committee consisting of the Chancellor, Vice-Chancellor, and four elected Fellows, subject to the direction and control of the Senate.

"Challis" Fund.—In 1880 the late Mr. J. H. Challis bequeathed to the University his whole estate, which, under the terms of the will, was transferred to that institution in September, 1889. The assets in Australia and England amounted to £276,856. The Senate has decided that the Fund shall be applied as permanent provision of income for educational uses. Through the agency of the Fund seven "Challis" Professorships and six "Challis" Lectureships have been established.

Other Foundations.—There are also the "Hovell" Lectureship, £6,000; the "Wentworth" Travelling Fellowship, now amounting to £4,060, and the Curatorship of the "Macleay" Museum, £6,000. In the year 1885 a sum of £30,000 was received from the estate of the late Mr. Thomas Fisher for establishing and maintaining a library. In 1896, the University received a donation of £50,000 from Mr. P. N. Russell; and, in 1904, a second amount of £50,000, to endow the Department of Engineering; and there are other Foundations smaller in amounts.

University Museums.—The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History, and the Museum of Normal and Morbid Anatomy, attached to the University, are accessible to the public under certain regulations. The Aldridge Collection of Broken Hill Minerals donated by Mr. Hugh Dixson is housed in the Macleay Museum.

Fisher (University) Library.—The Fisher Library building at the University was opened in September, 1909. The Library contains, approximately 100,000 volumes.

Bursaries.—Bursaries are conferred only when satisfactory proof is produced that the means of the candidate, or of his parents or guardians are insufficient to enable him to attend the University without such assistance. There are seventeen at the disposal of the University. These have been created (on the initiation of the late Dr. Badham, when Professor of Classics) by private foundations. They are supplemented, on the part of the Senate, by an exemption from matriculation and lecture fees, except in case of those available in professional schools.

Secondary School—University Bursaries.—Other bursaries are available annually upon the results of the Leaving Certificate Examination under the Bursary Endowment Act, 1912. Candidates must qualify for Matriculation, and must satisfy the Bursary Endowment Board that their own and their parents' means are unequal to the expense of the University education. For information relating to these Bursaries, see Table No. 24.

In the University (Amendment) Act of 1912, provision is made for two hundred public exhibitions, to be awarded on the results of t Leaving Certificate Examination. The exhibitions are granted by the Public Instruction Department to those candidates who have qualified Matriculation, and who intend to graduate in the University. They exempt the holder from Matriculation, Tuition, and Degree Fees. Table No. 25.

Establishment of Technical Education.—During the year 1873 a proposal was entertained to establish a Technical or Working Men's College. In 1878 a sum of £2,000 was granted by Parliament for the organisation of the Technical College, and for five years the classes were carried on at the College. In 1883 a Board was appointed by Government to take over the management, but towards the end of 1889 the Board was dissolved, and the Technical Colleges were placed under the control of the Minister of Public Instruction. In 1892 the Technical College at Ultimo was opened to students.

* See also Table 21. † The reduction in number of Students is due to the war, the greater number of boys who attend this farm being drawn from Great Britain.

Hawkesbury Agricultural College.—The course of study includes the principles of agriculture, the breeding, rearing, feeding, and management of live stock, chemistry, soil physics, botany, vegetable pathology (including the use of the microscope), entomology, veterinary science and practice, elementary mechanics, farm engineering, elementary surveying, bacteriology, meteorology, farm book-keeping, and all kinds of practical work on the farm. Students receive instruction in field operations, the use of farm implements and machinery, all dairy operations, the necessary carpentry, saddlery, blacksmithing, and engineering required on a large farm, the management of bees and poultry, and all branches of gardening and orchard work. There is accommodation for 200 students.

Farm School at Wagga Experiment Farm.—Students are instructed in the principles of agriculture and horticulture suitable for the Riverina and other districts having similar climate and soils, and especially in the production of wheat of the highest quality true to name, field operations, the use of farm implements and machinery, the management of stock and poultry, viticulture, fruit-drying, raisin-making, and various branches of gardening and orchard work. There is accommodation for 60 students.

Farm School at Bathurst Experiment Farm.—Students are instructed in the principles of agriculture and horticulture, field operations, the necessary carpentering and engineering required on a large farm, the use of farm implements and machinery, elementary blacksmithing, the care, breeding, and fattening of stock, fruit growing and preserving, and various branches of gardening and orchard work. The principal features of the farm work are the growing of wheats and other crops suitable for the mid-tableland district, and other districts having similar climate and soils, sheep-raising, and the production of mutton for export, and orchard work. There is accommodation for 34 students.

Farm School at Yanco Experiment Farm.—Students are instructed in the principles of Agriculture and Horticulture; field operations, use of farm implements and machinery, management of horses, sheep, cattle, pigs, poultry, and ostriches, viticulture, fruit-drying, raisin-making, fruit packing, and various branches of gardening and orchard work. This farm is on the Murrumbidgee Irrigation Area, and special attention is paid to experiments in and methods of irrigation. The farm covers an area of about 2,000 acres, of which 500 are irrigated, and used for cropping as a mixed farm; 70 for fruit growing, and the remainder for grazing and ostrich farming. There is accommodation for 13 students.

Farm Apprentice School at Wollongbar Experiment Farm.—Special facilities are afforded at this school for apprentices to acquire a knowledge of practical dairying work as carried out in the semi-tropical portions of the State known as the North Coast. Apprentices are instructed in the methods of growing crops for fodder, handling and treatment of milk and cream, and the manufacture of butter and cheese, cattle-breeding, rearing and management. There is accommodation for 20 apprentices.

Farm Apprentice Schools at Cowra, Glen Innes, Grafton, and Dural.—The main features at Cowra are wheat and sheep; at Glen Innes, wheat and other cereals, sheep, dairy cattle, pigs and poultry, fruit growing, and artificial grasses; at Grafton, dairying, maize, potatoes, pig and poultry raising, &c. At the Dural Demonstration Orchard, attention is given to the growing of fruit suitable to the County of Cumberland. Accommodation:—Cowra, 22; Glen Innes, 24; Grafton, 18; Dural, 6.

Bursaries.—Three bursaries each may be given annually at the Hawkesbury Agricultural College, and the Farm Schools at Wagga and Bathurst Experiment Farms, and one to Wollongbar Apprentice School. The bursaries will be tenable for three years at the College, for two years at the Farm Schools, and one year at the Farm Apprentice School, and will be awarded to youths whose parents' circumstances and their own aptitude and qualifications render them deserving of this assistance.

Scholarships.—Three scholarships are awarded annually to students of the Hurlstone Agricultural High School who have passed with credit through the two-years' course at the school, and entitle the holders to a two-years' course at the Hawkesbury Agricultural College without payment of fees, and to a grant of £1 10s. per annum for text-books. The winners commence on the second-year course at the College.

The Government "Farrer Scholarship" is of the value of £91, and covers three-years' course at the Hawkesbury Agricultural College, including education, maintenance fees, text-books, and apparatus, medical fees, laundry charges, and sports fees.

Farrer Research Scholarship.—This scholarship is established to enable the holder thereof to carry out researches tending to the improvement of wheat cultivation, thereby continuing the work of the late William Farrer. Such researches may be carried out in the laboratories of either the Department of Agriculture or the University, or in the field, or in the mill or bakehouse, or a combination of any of these. The scholarship is open to competition amongst graduates in science, or undergraduates, diploma students of the Hawkesbury Agricultural College, or a similar institution, young farmers with necessary qualifications, &c. The scholarship is valued at about £90 per year.

The *Daily Telegraph* "Farrer Scholarship" consists of a grant of £10 to the best wheat student at Bathurst or Wagga Farm School each year.

Hurlstone Agricultural High School.—Students receive instruction in practical operations of agriculture and experimental work in the growth of crops, action of manures, &c. There are 40 students in residence. There were 3 bursars and 15 holders of scholarships in December, 1915.

Government Agricultural Training Farm.—The figures shown in the above table are for the year ended 30th June. There were 4 in residence at 30th June, 1916.

Technological Museum.—This museum, established in 1879, was first administered by a committee of management appointed by the Trustees of the Australian Museum. It was transferred to the Department of Public Instruction on 1st January, 1890, as an integral part of the system of Technical Education. Special endeavours are made to collect the raw products and samples illustrative of the industries and manufactures of Australia; and the museum contains a large number of mineral and vegetable products, and a comprehensive series of specimens of wool.

The Technological Museum and Branches are open to the public free of charge.

School Museums.—At most of the Public Schools, Museums have been established for the practical use of the pupils. The Technological Museum assists public schools in Nature-study. Specimens are named, classified, and supplied for the purpose of assisting teachers in the formation of school museums.

Australian Museum.—The Australian Museum was founded in 1836. It was originally connected with the Botanic Gardens, and was located in a room in Macquarie-street, Sydney, but was afterwards removed to the Surveyor-General's Office, and again, in 1849, to its present site. Its affairs were managed by a committee until 1853, when the Museum was incorporated under Trustees. Provision is made for a State endowment which is supplemented by annual Parliamentary appropriations. The Museum is open to the public free of charge, except on Mondays, when students only are admitted. It is primarily a Museum of Natural History.

Art Students.—Art students desirous of making studies of works in the Gallery may do so under certain regulations.

Wynne Art Prize.—Instituted in 1897, and consists of the interest on approximately £1,000, bequeathed by the late Richard Wynne. The prize, which is under the control of the Trustees of the National Art Gallery, is awarded annually to the Australian artist producing the best landscape painting of Australian Scenery in oils or water-colours, or the best production of figure sculpture executed by an Australian sculptor.

NOTE.—The National Art Gallery of New South Wales is open to the public, free of charge, on Week-days and Holidays at 10 a.m., and on Sundays at 2 p.m.

No. 77.—The Sydney Observatory, 1915.

The Sydney Observatory was established in the year 1856. It is situated 144 feet above sea-level. Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·1″ east.

The Observatory was visited by 524 persons during the year.

Astronomical Work at Sydney Observatory.—The observations taken comprised 140 clock stars, 40 azimuth stars, and 192 determinations of collimation and azimuth. The 11½-inch refractor was used on three evenings making observations with Westrand Comet. At the Red Hill Observatory no photographic plates were exposed (with the exception of a few test plates which were taken for focus and adjustment purposes) owing to the re-modelling of the Astrographic Telescope. The daily time-ball service at Sydney and Newcastle was maintained; and the seismograph worked continuously throughout the year, 72 tremors having been recorded on the instrument.

No. 78.—Meteorological Bureau, Sydney, 1915.

The Meteorological Bureau, Sydney, is administered by the Commonwealth Government.

Two Bulletins and one Weather Chart are published daily. The Bulletins, issued at 10 a.m., and 3 p.m., contain respectively full reports from 241 stations.—

(1) Pressure, temperature, wind, rain, weather, and state of rivers at 9 a.m.
(2) Wind, weather, and state of sea at 2 p.m.

Another Bulletin showing pressure, temperature, wind, rain, weather, and state of sea at the principal centres of the other States is issued at 1 p.m. daily.

The Weather Chart, published during the afternoon, contains complete data, isobars, full notes, shaded rain-area, and forecast for the ensuing 24 hours. A local forecast for Sydney is published at 10 a.m. daily, and forecasts for the whole of the Commonwealth at 1 p.m.

During the year there were issued 15,095 Bulletins, 23,656 Weather Charts, and 11,317 Rain-maps of New South Wales. The last show the daily, monthly, annual, and storm distribution of rainfalls, together with departures from average.

An isobaric chart, depicting also by symbols at a number of stations, the direction of wind, rain-areas, thunderstorms, and condition of sea, together with a concise note on the resulting weather since the previous day, was prepared regularly in the Weather Bureau for publication in the Sydney newspapers.

Forecasts were telegraphed each day to 117 towns.

During the year 32 extra climatological stations were established, the number now being 2,046. All stations are equipped with rain-gauges, and they may be classified as follows:—

40	self-recording mercurial barometers, hygrometers, maximum and minimum thermometers.*	
94	„	maximum and minimum thermometers with properly-constructed screens.
1,912	„	rain-gauge only.

Monthly and weekly reviews of the weather over Australia generally are prepared, tracing the progress of the different changes in atmospheric pressure, and their effect upon the weather; and copies are sent to the metropolitan and country press.

* Many of these stations are also supplied with self-recording thermographs and barographs

* In December, 1908, the maintenance and control of the Lending Branch devolved upon the Sydney Municipal Council, but by agreement the Trustees of the Public Library were to continue the management until the conclusion of the arrangements for taking over the branch. The Council entered into possession on the 15th October, 1909. Particulars of the volumes issued on week-days from January to October, 1909, are not available.

Accessions, &c.—During 1915 the general collection of books was increased by 9,869 volumes, 3,022 books and pamphlets were presented, and 504 books, maps, newspapers, and periodicals were received under the provisions of the Copyright Act.

Books borrowed by Country Libraries, &c.—There were 6,811 volumes issued to country libraries in 81 towns of the State, 1,970 volumes were sent to 26 different lighthouses, 3,032 volumes were lent to 38 different Public School Teachers' Associations, and 1,848 volumes were lent to individual students in the country for special study.

Note.—A detailed classification of books in the Library, as published in former years, is not now available.

The Public Library of New South Wales.—The "Free Public Library" was established on the 1st October, 1869, when the buildings and books of the "Australian Subscription Library," founded in 1826, were purchased by the Government. During the years 1886-7 considerable additions were made to the premises; the new buildings were opened in April, 1890. In 1877 the operations of the Library were extended by means of a Lending Branch. Under certain regulations books were borrowed by individuals, country Libraries, Mechanics' Institutes, and groups of Students in Country Districts, free of charge. During 1903 the Library took control of the "Lighthouse Library," and now lends boxes of books to lighthouses of New South Wales. During 1895 the name "Free Public Library" was changed to "The Public Library of New South Wales." In December, 1899, the Library was incorporated, with a statutory endowment of £2,000 per annum.

Mitchell Library.—Mr. D. S. Mitchell, M.A., at his death on 24th July, 1907, bequeathed to the State the whole of his unique collection, consisting of books and manuscripts principally relating to Australasia, and comprising 60,100 volumes and 300 framed paintings of local historic interest, a collection valued at £100,000. He also endowed the Library with an amount of £70,000, the income from which is to be expended on books and manuscripts. This income now amounts to about £2,750 per annum. The Library was opened officially on 7th March, 1910, and the public are, under certain necessary regulations, admitted. The volumes now number 85,240, and there are many thousands of manuscripts.

Light Gold and Silver Coins.—Light gold coins in parcels of not less than £50 nominal value are received at the Sydney Mint and recoined free of charge, but depositors are required to bear the loss by abrasion. Under the Order-in-Council of 16th March, 1892, as extended by the Order-in-Council of 19th March, 1908, light gold coins are withdrawn by the Sydney Branch Mint, at their nominal value, provided that they have not been called in by any proclamation, and have not been treated illegally. The Coinage Act, 1891, defines a gold coin as being used illegally, when it has been impaired, diminished, or lightened otherwise than by fair wear and tear, or has been defaced by stamping any name, device, or number thereon. The Act further defines a loss of weight from the standard weight exceeding 3 grains as *primâ facie* evidence that the coin has been used illegally.

British Silver Coin.—The withdrawal at Sydney of re-issuable silver coin, not exceeding a nominal value of £50,000 in any one year, is authorised. Coin so withdrawn is shipped for use in other parts of the Empire. Worn silver coin withdrawn is melted into ingots, which are shipped to London for recoinage.

Mint Charges.—Gold deposited at the Sydney Mint for melting, assaying, refining, and coining is subject to a charge per ounce, and the charges are deducted from the gross value of the deposit. They are—

(A) For assaying and coining.—Charge fixed by the Sydney Mint Proclamation, 1900—1d. the ounce standard.

(B) For melting and refining.—Levied on all gold insufficiently refined and toughened for direct conversion into coin—

- (*a*) A deposit of 500 ounces or under, at the rate of 3d. the ounce, gross.
- (*b*) A deposit of more than 500 ounces, but not more than 1,000 ounces, at the rate of 2d. the ounce, gross.
- (*c*) A deposit of more than 1,000 ounces, at the rate of 1d. the ounce, gross.
- (*d*) A deposit containing more than 5 per cent. of base metal, at the rate of 1s. the ounce for all base metal contained therein, in addition to the ordinary charges for melting, assaying, refining, and coining.

The minimum charge on any one deposit is 6s., except in the case of deposits containing more than 5 per cent. of base metal, when the minimum charge is 10s. 6d.

Silver retained.—In addition to the above, the Mint authorities retain all silver contained in deposits, but payment is made for the silver in excess of 8 per cent. at a rate from time to time fixed by the Deputy Master. The rate paid from the 1st January to the 30th November, 1901, was 2s. 3d. per oz. fine; from the 1st December, 1901, to the 11th May, 1902, 2s. per oz. fine; and from the 12th May, 1902, 1s. 6d. per oz. fine.

Deposits.—Sums of one shilling, or any multiple of that amount, may be deposited in the Government Savings Bank, but with the exception of the funds of Friendly Societies and Charitable Institutions, deposits exceeding £500 do not bear interest on the excess. The rate of interest allowed on deposits to 30th September, 1915, was:—Ordinary depositors, 3½ per cent. to £200, and 3 per cent. from £200 to £500; Friendly Societies and similar institutions, 3½ per cent. up to £500, and 3 per cent. on excess without limitation. From 1st October, 1915, to 30th June, 1916, the rate was 3¾ per cent. to £500 on ordinary accounts, and on Friendly Societies and similar accounts, 3¾ per cent. to £500, and 3 per cent on excess without limitation.

No. 23.—Annual and Total Loan Expenditure, 1842-1916.

NOTE.—The difference between the actual Loan Expenditure stated below and the Public Debt, as shown in No. 265 and following tables, is due to the fact that the outstanding debt represents the gross amount sold, while the expenditure is the net amount after deducting discount and expenses of flotation and allowing for debit balance of Loan Account.

* Exclusive of £724,733 expended prior to the inauguration of Loans Account, which, with the amount already stated (£569,930), gives a total expenditure on Immigration to 30th June, 1916, of £1,294,663.

No. 26.—Public Debt Statement, 1855-1916.

NOTE.—The difference between the amounts outstanding at the close of each year does not, as a rule, represent the actual increase or decrease in the Debt. Repayments of loans are generally effected under the head of renewals, and in following out this practice, it is usually found necessary to float the redeeming loan some time before the due date of the maturing loan ; hence the liability appears twice in the Debt Statement till the bonds or stocks are retired.

London Agents.—Operations connected with the issue and inscription of Stock are conducted by the Bank of England and the London and Westminster Bank. The former charges ½ per cent. per £100 Stock on all loan issues, and £350 per million annually for the inscription and management of Stock, including the payment of the half-yearly dividends, while the latter charges ¼ per cent. and £150 per million respectively for similar services.

Local Agents.—The Bank of New South Wales and the Commercial Banking Company of Sydney, Limited, transact all Government banking business. The former acts as Financial Agent for the State in Victoria, and also undertakes the payment of the half-yearly dividends on Local Debentures and Funded Stock. The Treasury, however in local loan issues, directly conducts the operations connected with the issue of New South Wales Funded Stock and Treasury Bills.

* Overdue and unpresented. † Approximate—rate not definitely fixed.

NOTE.—Until the close of 1870, the proceeds of loans negotiated in the State were placed to the credit of the Consolidated Revenue Fund. From the beginning of 1871, a new system was adopted, and a separate fund established for each loan floated on and after that date. The first loan treated under the new conditions was that for £374,900, floated in 1871, since redeemed; and no alteration took place till 1879, when all the separate funds were amalgamated under the authority of the "Loan Fund Amalgamation Act," and the subsequent flotations have been carried to the "General Loan Account."

No. 29.—Public Debt, Loans Redeemed to 30th June, 1916.

The Hospital Saturday Fund of N.S.W.—This Association is registered under the Companies Act. It is managed by a Board of thirty members and eight honorary officers, all of whom are elected annually. Indoor collections at places of business, household collections by means of boxes, and an annual outdoor collection are made by honorary collectors for this fund. The money obtained is distributed amongst certain hospitals and auxiliary medical charities, and is included in the revenue returns of these institutions. The great outdoor collection throughout Sydney and Suburbs is made each year on the first Saturday in May, which is known conventionally as "Hospital Saturday."

Note.—These "Causes" are taken from the statements in the papers received with the Patients on admission, and are verified or corrected as far as possible by the Medical Officers. The "predisposing" and "exciting" causes are both enumerated in all cases where the predominating causes could not be distinguished, so that the aggregate of the totals for each of these years exceeds the total number of patients admitted yearly.

* The figures quoted include the operations, so far as men are concerned, of the State Labour Bureau from 1st July to 18th September, 1913 (on which date it was amalgamated with the State Labour Office under its present title of the State Labour Branch), and of the State Labour Branch from that date to 30th June, 1914.

NOTE.—A Free Registry Office at Sydney, with branches in Country Districts, for men, is maintained by the Government. The Government Registry Office for women was discontinued on 31st January, 1906. A new office was opened in May, 1914, under the name of "Women's Employment Agency"; the particulars for 1914, therefore, apply to the months of May and June only.

[1] Receiving-house; children remain until boarded out or otherwise dealt with.

[2] During the year ended 30th June, 1916, food to the value of £75 was distributed. In addition 168 men known as "specials" or "casuals" were admitted for short periods (usually three days each) in connection with the food relief scheme.

[3] See also under "Hospitals," the Royal Hospital for Women and the Renwick Hospital for Infants in connection with this Society. Outdoor relief was given to 168 women and 236 children.

[4] Meals given to 99,605 men, 2,779 women, and 47 children, and on Sundays breakfasts to 4,456 persons; whilst to 33,581 (men, women, and children) shelter was afforded. Employment, too, was found for many persons.

[5] Illegitimate children are not admitted unless the mother is willing to come into the Home with the child.

[6] 680 visits were paid by the teachers to the blind in their own homes, 617 lessons given, and 5,857 books were circulated free to blind workers.

[7] 4,907 men were admitted to the Refuge for shelter and help.

[8] 15,196 meals provided, 4,255 beds supplied to women, and 1,047 beds supplied to children with their mothers.

[9] 18 girls sent to Alexandra Home, 20 to other institutions, 11 to friends, and 15 to situations.

[10] At this shelter 8,295 cheap beds, and 1,460 free beds were provided.

[11] Cheap beds 8,295, free meals (Rescue Homes) 16,520, beds supplied at headquarters 23,657, free beds (Rescue Home) 5,840, People's Hostel Beds 14,582, employment obtained for 421.

[12] Attendance of seamen at Institute 12,159, ships visited 213, concerts for seamen 50, letters received for seamen 2,162, seamen's money taken care of £1,159 7s. 6d.

[13] Beds supplied 19,938, meals supplied 33,195.

[14] This Institution afforded shelter to 8,078 men gratuitously.

NOTE.—The Census of the aboriginal population of the State is collected annually by the police on behalf of the Aborigines Protection Board. Great difficulty is experienced by them in collecting the Census, especially in the remote districts, owing to the nomadic habits of the race, many of whom frequently cross the borders of the State, and also travel from one locality to another in the State. Under the circumstances, therefore, the figures in the above table can be regarded as only approximate.

* Decrease is doubtless due to a number of those formerly claiming to be aborigines, with a trace of aboriginal blood, including quadroons and octoroons, who have really no rights on a reserve set apart for the use of aborigines, having left the reserves with the object of supporting themselves and their families.

United Charities Fund.—This Fund is administered by a General Committee composed of delegates of the Associated Charities within Sydney and Suburbs, except the medical charities coming within the scope of the Hospital Saturday Fund. Participating institutions must have been in existence for two years, must publish annual reports and balance-sheets, and supply all information desired by the Council. An annual collection is made throughout the Metropolis, and the money is allotted to the charities by the General Council of the Fund. These amounts are included as revenue of the institutions shown in previous tables.

Thermometers.—The thermometers are exposed in a shed 11 feet square, of which the sides are 5 feet 6 inches high, and enclosed to within about 30 inches of the ground with open lattice-work. The roof is conical, rises to 13 feet above the ground, and is covered with louvres close enough to keep out rain.

Rain-gauge.—The rain-gauges are circular, 8 inches in diameter, and with rim 15 inches above ground. Two similar gauges, placed on the ground 6 feet apart, are used; the larger record is taken. The pluviometer results are from a gauge of the same diameter as the rain-gauge, 4 feet above ground.

No. 17.—Rainfall during 1915.

During the year 1915 the rainfall over the greater part of New South Wales was most unsatisfactory, being considerably below normal, and only limited areas in the Riverina, the South-Western Slope, the Northern and Southern Tablelands, received falls above the average. In other divisions the rainfall was very light almost throughout the year. In April the Northern Tableland, the Metropolitan area, and the South Coast received soaking rains, but otherwise the first four months of the year were exceptionally dry. From May to September (inclusive) there were partial breaks in the droughty conditions, and a few districts, notably the Slopes, Plains, and Tablelands, received fairly satisfactory falls, but the weather in November was most unfavourable, being the worst experienced during the year. The most definite break in the almost persistent dryness occurred in December, and many parts of the Plains, Slopes, Tablelands, and Coast received totals exceeding the monthly average.

During the first quarter the temperature generally was hot, and some excessively high readings were recorded, but in the winter the weather conditions were, for the most part, mild, with a rarity of severe frosts. Seasonable weather prevailed during the remainder of the year, and the ruling conditions were generally mild to warm.

Similar particulars for each month are as follow :—

January.—The rainfall was very poor, and quite in contrast with the registrations of the previous month. In the Western Division the falls were particularly light, the heaviest being 52 points at Euston, while at many stations there was a total absence of rain. Normal conditions were exceeded only in the Braidwood, Moruya, and Hillston districts. The temperature generally was oppressive, and high readings were recorded throughout the State, although the conditions were relieved occasionally by cool changes.

February.—In a few districts there was a total absence of rain, and the reports from a majority of the stations indicated falls considerably below the average. In fifteen districts only the averages were above normal, due in most instances to heavy thunderstorms.

Pronounced heat waves were experienced, and some unusually high readings were recorded, especially in the White Cliffs, Bourke, Tibooburra, Wilcannia, Menindie, and Cobar districts.

March.—Droughty conditions prevailed, with heat waves in parts of the State, accompanied by severe winds and duststorms. The month would have been classed as one of the driest on record but for the beneficial rain received at the close. No falls of any importance were recorded until the last week, when a monsoonal disturbance developed over the eastern half of the State, and, with many thunderstorms, resulted in splendid rains over the central and southern coast, Tablelands, Slopes and eastern Riverina, the wheat belt generally receiving much benefit. The greater part of the State, however, had no rain at all, or the amounts were extremely light.

April.—The rainfall on the whole was below the average. The districts which benefited specially, and in which excesses occurred were :—Part of the coast between Newcastle and Gabo; the central portion of the North-Western Plains, Slopes, and Tablelands, together with a few isolated stations. The central and northern borders had little or no rain, and although the country westward from the Tablelands was much better served, the falls generally were very light, and in many instances failed to reach 50 points.

May.—The dry weather which ruled throughout almost the whole State from January to April was broken entirely during May, with the result that a considerable area west of the highlands, in which very little rain had been received, had bounteous falls. In the first week the Central and South Coast districts had heavy rains, accompanied by strong south-east winds, but the principal falls occurred about the middle of the month, when the whole State benefited. With very few exceptions, the rainfall throughout the State was above the average.

June.—Fine weather ruled inland during the first and third weeks, the only rain recorded being confined entirely to the coastal division; but in the second and fourth weeks the whole area west of the Tablelands participated in beneficial rains. As a whole, the falls were above the average over an extensive portion of the southern half of the western division, southern Riverina, the central Western Slope, the southern portion of the Northern Slopes and Tablelands, and the south-eastern corner of the State.

July.—The State was visited by four rainstorms, mostly of monsoonal character, one occurring each week. The falls in the first and third periods were of general distribution, and a large area of country west of the Tablelands benefited considerably, as normal conditions were exceeded. The other storms occurred mainly in the eastern and northern districts, but the rainfall in the coastal area was below the average.

August.—Four rainstorms visited the State, and a very extensive area of the wheat belt was specially benefited, the falls recorded being in excess of the average. With the exception of the South Coast, considerable shortages were reported in the coastal division.

September.—The weather during the first fortnight was generally dry, although scattered rains were reported; but in the remaining period, owing to pronounced disturbances, general rains, accompanied by strong and squally winds, occurred. A considerable area of the State received falls in excess of the average, especially in the western Riverina, Western Slopes, Southern Tablelands, and South Coast divisions. On the eastern half of the northern border districts, and on the northern and central coastal areas, the rainfall was much lighter.

October.—Light to moderate rains were reported over the central and southern districts, and excess averages were recorded in the Central Western Plains, Riverina, Central and South-western Slopes, and Southern Tableland divisions. In other southern and western divisions some fairly good scattered falls were recorded, but on the North Coast there was an almost total absence of rain, and serious drought conditions were experienced.

November.—The rainfall was very light, and, with the exception of a few stations on the south-eastern highlands, the registrations for the month were much below the average in almost every division. In the northern and coastal districts the severe drought, which had prevailed for some time, was still unbroken, and the continued absence of rain seriously affected pastoral pursuits.

December.—The outstanding features of the weather were the prevalence of monsoonal rain conditions, and the consequent break in the dry spell, which in many parts of New South Wales had assumed the character of a serious drought. General rains were recorded early in the month, and later a tropical storm caused splendid falls throughout the State. The principal divisions most favoured were as follow : North-western Plain, Hunter and Manning, Central Western Plain, Southern Tableland, North-western Slope, Northern Tableland, and South-western Slope. The North Coast was practically the only area which did not receive totals exceeding the average.

* The figures quoted represent the area on which the balance of purchase-money was paid during the year, and consequently average price per acre cannot be given.

Surrenders, Exchanges, and Road Resumptions.—Surrenders and exchanges are effected under Sections 195, 196, 197 of the Crown Lands Consolidation Act, 1913, and Road Resumptions are treated under the Public Roads Act, 1902. As land is exchanged for land without any monetary consideration the extent of the area of Crown Lands is not thereby affected.

Resumptions and Purchases.—The total alienations represent the gross area, no allowance being made for the gifts of land and the resumptions and direct purchases made from private owners on behalf of the various departments, for particulars of which see Table No. 41.

Land acquired by the State.—Land may be acquired by resumption, purchase, exchange, surrender, and by gift. Resumptions are made under the "Public Works Act" and the "Lands for Public Purposes Acquisition Act." All resumptions, other than those made by the Minister of Public Instruction and the Commissioners for Railways, are treated by the Government Land Valuer. Resumptions under the Commonwealth Lands Acquisition Act, 1906, are also included.

NOTE.—Under the Closer Settlement Promotion Acts, three or more intending settlers, each possessing the qualifications necessary to hold a settlement purchase, may enter into negotiations for the purchase of suitable land in their own district or in localities where they may wish to settle, and each person must hold his farm solely in his own interests and not on any system of co-operation with the other applicants. Each applicant is required to lodge a deposit of £5, and any further sum required to meet costs of dealing with his application, survey, &c. The next cost is 5½ per cent. of the Crown valuation of the farm, the other 94½ per cent. being advanced by the Government Savings Bank; thereafter, annual instalments of 5½ per cent. (being 4½ per cent. interest and 1 per cent. capital) must be paid until the whole indebtedness is discharged in thirty-five years.

The following table sets out the scheme for repayment of the purchase money :—

	£
Capital value	100
Deposit	5
Annual instalment	5½
Interest on unpaid balance	4½ per cent. per annum.

It is competent for an applicant to pay two or more instalments at any time, should he so desire. Provision is made for postponement of one or two instalments on application to the Minister, which may be granted, should it be decided that the circumstances warrant it. An applicant may obtain from the Government Savings Bank an advance on the value of improvements which may have been effected on the farm by the Settler.

NOTE.—The above figures are compiled from returns supplied by the Sydney Harbour Trust, and differ from those in preceding tables on account of the inclusion of the tonnage of vessels engaged in trade between State ports and Sydney, and of vessels which proceed to Newcastle for bunker coal, but which do not report at the Customs on return to Sydney.

No. 26.—Shipping Registered during Year ended 30th June, 1916.

NOTE.—Mortgages of Registered British Vessels are under the Imperial Merchant Shipping Act of 1894. The mortgages are divided into two classes—one in which the ship is the sole security Principal Sum, and the other in which advances are made on the security of what is termed "the Account Current"—an Account Current being in most cases secured by land and other properties, in addition to shipping. The mortgage deed is generally executed for the full amount of the advance.

NOTE.—All certificates must be renewed at least every twelve months. For a six month's certificate the charges for vessels not exceeding 50 tons are £1; over 50 and under 100 tons, £2; over 100 and not exceeding 300 tons, £3; and an additional £1 for every additional 300 tons or part thereof, with a maximum fee of £10. For a twelve month's certificate the charges are double these rates, with a maximum of £20. The charges for motor-boat certificates are £1 to £2, according to length. Under the provisions of the Navigation Act, 1901, all vessels, steam or sailing, passenger or cargo, require certificates.

No. 41.—Pilotage—Entries and Clearances, Comparative Table.

PILOTS AND PILOTAGE.—Appointments to the Pilot Service are made by the Governor and Executive Council, and all Pilots are Government officers. Certificates of Exemption from Pilotage for the various ports of the State may be granted to British subjects, and may be granted and used only in respect of British ships registered in the Commonwealth or New Zealand employed in the Australasian, South Sea Island, or the whaling trade, on passing the necessary examination, provided they have been with their vessels as masters or chief officers three times in and out of the particular port for which the Exemption Certificate is desired. Masters of vessels who hold Certificates are not liable for pilot dues unless the services of a Pilot are obtained.

* At the Clarence River the Department of Navigation conducts the tug service

NOTE.—The Department of Navigation subsidises tugs at the places mentioned in the above table for the purposes of towing vessels in and out of port or river. The tugs are not allowed to leave the station without the sanction of the Department, and the master must endeavour to be in the vicinity when vessels are ready for sea, and in cases where vessels are in actual danger he must promptly render assistance. The maximum rate for ordinary towing is fixed at 4d. per registered ton, with a minimum of £1 10s. Disputes arising with respect to special services must be settled by arbitration. The masters of tugs are required to take pilots off to vessels signalling for services of a pilot.

Wrecks.—The wrecks and disasters to British merchant shipping are those which came within the jurisdiction of the Court of Marine Inquiry of N.S.W. The wrecks of Foreign shipping relate to vessels the loss of which formed the subject of inquiry by Consuls of foreign countries. The list does not include vessels which have left the State and have apparently been lost, as they have not since been reported.

No. 51.—Certificates, Department of Navigation—Comparative Table.

Department of Navigation.—The "Navigation Act, 1901," created the Department of Navigation.

Certificates—*Master.*—To obtain a master's Foreign-going certificate, a candidate must be at least 21 years of age, and have served six years at sea. For the coast trade the minimum age is 21 years, and the service at sea five years, one year of which must have been as mate, or 2½ years second mate on the coast in charge of a watch.

Mate.—To obtain a mate's Foreign-going Certificate, a first mate must be at least 19 years of age, and have served five years at sea, one year of which must have been as mate in a grade not lower than third or fourth mate in charge of a watch, whilst in possession of a second mate's certificate. For second mate the minimum age is fixed at 17 years, and the service at sea four years. For the coast trade a mate must be at least 19 years of age, and have served four years at sea. A second mate must be 18 years of age and have served three years at sea.

Engineer.—A candidate for a first-class certificate of competency must be at least 22 years of age, and for the second and third-class certificates the minimum age is fixed at 21 years.

Marine Surveyor.—Certificates of Competency are issued for Marine (ship) Surveyors and Marine (engineer) Surveyors, to persons who pass the prescribed examinations for these certificates. A candidate for Marine (ship) Surveyor's certificate must have served five years at sea while holding at least a first mate's certificate, and at least one year of this service must have been as master. He must also hold a master's foreign-going certificate. Candidates for Certificates of Competency must possess a certificate of competency as a first-class engineer, and have served five years as engineer of a sea-going steamship, with a certificate not lower than that of a second-class engineer. One year at least must have been served while in possession of a first-class certificate while in a sea-going steamer of over 100 nominal horse power. Certificates of Service are issued to persons who have served as Marine Surveyors for three years prior to 1881.

Pilotage Exemption Certificates are granted to British subjects holding certificates of competency as master, either for a foreign-going or coast-trade vessel, who can prove that they have acted in the capacity of master or first mate of a vessel entering and departing three times from the port for which exemption is desired, and the certificates may be used only in the Australasian or South Sea Island trade, on vessels registered in the Commonwealth or in New Zealand.

Coxswains and Drivers of Motor Boats.—Licenses are issued under the Amended Motor Boat Regulations, 1914, to persons desirous of qualifying as Coxswains and Drivers of Motor Boats. A candidate for either license must be 18 years of age. A Coxswain must show two years' service in a harbour and river steamer, or in a motor boat, and a driver twelve months practical experience with oil engines.
